

# Clare P. Grey

Professor of Chemistry  
1994-2015

Materials and Structural Chemist, Center Director

NMR Studies of Cathode Materials for  
Lithium-Ion Rechargeable Batteries,  
*Chemical Reviews*, **104**, 4493 (2004).

Professor Grey explored the structure and function of solid state materials with NMR, X-ray and neutron diffraction, and electron microscopy, with a focus on novel materials for fuel cells, batteries, and supercapacitors. She was instrumental in raising the national profile of energy research at Stony Brook and served as Director of the Northeastern Center for Chemical Energy Storage, a DOE Energy Frontier Research Center.
