SUNY Korea Headcount Enrollment by Plan (Major)

About these data: These data count students enrolled at SUNY Korea as of the end of term snapshot. This snapshot is captured after the end of a Stony Brook University term. Because of the different start dates for SUNY Korea terms, the Day 15 Snapshot (official for SBU) does not reliably reflect SUNY Korea enrollments. Students enrolled at SUNY Korea are not counted in official University headcounts for Stony Brook University because their campus is located in a foreign country, not the United States. These data do not include students on leave for military service, or students on leave for other legitimate reasons. This report counts unique students, therefore fall and spring totals will not add to the total for the year. This report only counts students registered for courses or the IEC program at SUNY Korea - students registered for courses at Stony Brook University, or students on leave for military service are not included.

Level/Program	2019		2019 Dist Total	2020		2020 Dist Total	2021		2021 Dist Total	2022		2022 Dist Total	2023		2023 Dist Total
