CURRICULUM MAPS

The tables below offer suggested course sequences for optimal degree completion, based on full-time or part-time enrollment. Students enrolled in or planning to enroll in the graduate student health insurance plan, must maintain full-time student status (9 credits) every semester they are enrolled. Students completing the two year track (see below) must request an underload from the graduate school before their last semester to maintain eligibility in their last semester, which requires only 6 credits. Please alert the graduate program director if this applies to you.

Information for Part-Time Students

Students wishing to enroll part-time must complete the program (33 credits) within 5 years. It is strongly suggested that students complete the degree in 3 years to ensure availability of required courses, as outlined below. Part-time students may elect to take a summer course if desired. Students wishing to complete less than 2 courses per semester should contact an advisor prior to enrolling to confirm course availability for upcoming semesters.
